EDUCATION

University of Illinois Urbana-Champaign

Aug 2026 – May 2030

Bachelor of Science in Computer Science

AWARDS

Asia-Pacific Informatics Olympiad (Taiwan) (May 2026) – Bronze medal

Indian National Olympiad in Informatics – Two silver medals in 2024 and 2025, and a gold medal in 2026 (top 30 and top 10 nationally respectively)

Indian National Mathematical Olympiad – Qualified for the exam (top 0.5% out of ~100,000 participants)

EXPERIENCE

Shortest Path to IOI

Jul 2024 – Present

Founder and Lead Trainer

- Founded and lead a free mentorship program, endorsed by IARCS (India's official informatics olympiad agency), that prepares students for the International Olympiad in Informatics (IOI)
- Secured \$11,500 in funding to run and grow the program
- Design and deliver lectures, set mock contests, and train students

Project Shilpkaar

Jul 2024 – Aug 2024

Front-End Developer Intern

- Developed the front-end of a web application for Shilpkaar to manage and track company transactions and orders
- Built a dashboard for viewing and managing orders, financial overviews, and individual financial records for the two primary stakeholders
- Implemented search functionality and a dark mode toggle to improve usability

PROJECTS

OI Checklist

Node.js, TypeScript, Prisma, Python

- Built a full-stack web app to track progress across major Olympiads in Informatics, covering ~2,900 problems from 26 sources
- Implemented auto-sync with oj.uz, qoj.ac, and CodeChef, and virtual contests with live timers, real medal cutoffs, and per-subtask scoring

arithmetica & basic-math-operations

x86-64 Assembly, C, C++, Python

- Built arithmetica, an advanced symbolic algebra engine that can do calculus, solve polynomial equations, and more
- Wrote basic-math-operations, the big integer library used by arithmetica, in x86-64 assembly, cross-platform and callable from C, C++, and Python

SKILLS

Languages: C/C++, TypeScript, Java, Python, HTML/CSS, SQL
